Your vision. Our experience. The perfect chemistry.

For more than a century, Kodak has been giving imagination an outlet by creating new ideas, then finding chemical processes to bring them to life. The ability to produce specialty chemicals that utilize complex processes has made Kodak one of the world's most respected and influential companies. With over 500 distinct molecules in production, more than 1,500 approved manufacturing processes, and experience with more than 100,000 complex chemicals, we empower progress every day. Let Kodak's Specialty Chemicals Group put our experience to work for your needs.

Industrial
Materials
Group

For more than 100 years, Kodak has been giving imagination an outlet by creating new ideas, then bringing them to life. Today that science can empower you in thousands of ways. Our Industrial Materials Group has the experience to help you create what's next, so you can bring tomorrow's ideas to market today.

Equipment

ISO 9001 certified custom and toll manufacturing specializing in complex, multi-step chemical syntheses.

Batch Readers

- 88 G/L and SS Reactors
- Distributed Controls
- Pilot to 1000-gallon scale

Isolation Equipment

Over 30 centrifuges, filter and membrane presses

Drying

Multiple rotary and tray drying

World Class Analytical Services

Complete portfolio of capabilities in house

U.S. based global operations include:

- Distillation facility for solvent recovery
- Dispersion/ink making plant
- PET film base manufacturing

Integrated global operations

Featuring established development/manufacturing assets and infrastructure

- Tri-generation power
- Water recycling and treatment facilities
- Global sourcing, warehouse with free trade zone, worldwide shipping
- HSE personnel, on-site fire department, hazmat and 24/7 gated security
- Expertise in custom synthesis and toll manufacturing
- Innovation ecosystem to leverage technology, facilities, equipment and manufacturing

Products

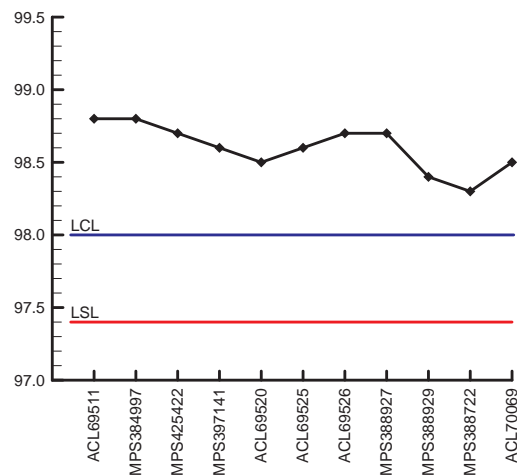

- Custom Synthesis and Toll manufacture
- Heterocyclic Intermediates
- NIR Dyes
- Electronic materials
- Photoactive compounds
- Functional Visible Dyes
- Functional Polymers and Dispersants

Disciplined Approach

- Over 1500 active manufacturing processes
- Stage gate process development
- Web access to quality and process control dashboards

Quality

- Statistical quality control processes throughout manufacturing
- Design of experiments methodologies applied in process development and troubleshooting applications
